**DETAILED ACTION**

1. Claims 1-62 are presented for examination.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to a method writing data into a static memory device.
  - II. Claims 8-11, drawn to a method of reading data from a static memory device.
  - III. Claims 12-62 drawn to an apparatus of a processor system.
3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions because method in group I is writing and method in group II is reading, they have different modes of operation.
4. Inventions I, II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method in group I is differenced method in group II, and methods in groups I and II can used with another apparatus. For example, the apparatus of claims 26-29 and claim 62. In claims 26-29, the invention do not need a current generating circuit as claimed in claim 62.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
